*Let's do this!*

Growing your business through social media can be a daunting task. All of the so-called "gurus" are preaching growth strategies that require 14,263 actions per day, showing your bubbly face non-stop, and giving up your firstborn to the Instagram gods in order to grow.

I'm here to tell you that you can create an incredible social presence that will not only help you gain followers who are ready to interact with you, but will also foster relationships that will have your new friends ready to buy from your brand!

The best part is, you can do it in less than 15 minutes a day AND with or without showing your face. . .

WHAT?!? I know, crazy! Let's do this!

# Take these ideas and make them yours

So let's get to the nitty-gritty!

After all, you are a busy business owner and you have other things to get to! So, here are the most important things to remember when using the **30 Days of Engagement** guide.

**Get Creative** - These engagement ideas are meant to be starting points that you can integrate into your unique brand. So, take the engagement idea and morph it into your own unique content that serves your audience! Use it to create a Reel or TikTok video for the day. Use it for stories and add interactive elements on Instagram/Facebook such as polls, questions or quizzes! Take each idea and use it as a starting point for engaging content that meets your brand identity and serves your unique audience.

**Speak to your audience as friends** - When interacting as a brand on social media, the goal is to attract followers, create relationships/attachment from those followers to your brand, build trust and THEN convert them into loyal customers! So, when creating engaging content remember that your followers are your friends and you should be speaking to them as if you are having a conversation with your best friend. Use endearing language like "Hey Besties!" or "What's up friends" (put your own spin and lingo into action). Address your audience like you are addressing your group of close friends.

**Show some personality!** - The social media world is so saturated with fake talk and people that are just simply trying to sell, sell, sell that consumers have become weary and numb to the typical creator. So, be memorable by sharing your personality within your brand! Don't be afraid to be yourself, use your sense of humour, share your story and let your audience see your personality. THOSE are the things that will keep them coming back for more and interacting with your content.
